User and Tester information

This user information sets out how the application Caltex Station Locator uses and protects any information in the application. If you have any questions, please feel free to e-mail us at support@caltex.com.

1. We may collect the following types of information

1.1. Location data

The application offers location-enabled services with our application. If you use those services, we may receive information about your actual location (such as GPS signals sent by a mobile device) or information that can be used to approximate a location (such as a cell ID).

1.2. Unique application number

Certain services include a unique application number that is not associated with your account or you. This number and information about your installation (e.g., operating system type, version number) may be sent to us when you install or uninstall that service or when that service periodically contacts our servers (for example, to request automatic updates to the software).

1.3. Other sites

This User Information applies to the Caltex Locator services only. We do not exercise control over the sites displayed as search results, sites that include Caltex Station Locator applications, products or services, or links from within our various services. These other sites may place their own cookies or other files on your computer, collect data or solicit personal information from you.
