Statement from Chevron Malaysia Limited

Chevron Malaysia Limited (“Chevron”), which markets the Caltex retail brand in Malaysia, confirms that our retailer’s employee working at a Caltex station in Benut, Simpang Renggam, Johor, has tested positive for COVID-19 on 21 March 2020. The individual is currently receiving appropriate medical attention. Our thoughts are with the retailer’s employee and the family, and we wish the employee a full and speedy recovery.

Our primary concern is the health and safety of our workforce and customers. We are working with the retailer who owns the station to implement measures as advised by the Malaysian Ministry of Health (MoH), by closing the station for industrial cleaning and disinfecting it by an environmental and regulated waste management company. Our other Caltex service stations are not affected by this case and our retailers continue to operate as usual, with appropriate health and safety guidelines in place.

Chevron is also working closely with MoH to identify individuals who have been in close contact with the affected individual. In accordance with MoH advisories and the World Health Organization criteria for close contacts, any visitors or customers who frequented the station premises from 19 to 21 March 2020 are urged to contact MoH at Tel: **03-888 10200**, **03-888 10600** and **03-888 10700** for further guidance on screening or testing.
