### **Statement from Chevron Malaysia Limited**

Chevron Malaysia Limited (“Chevron”), which markets the Caltex™ retail brand in Malaysia, confirms that one of our retailer’s employee working at a Caltex station in Taman Daya, Johor Bahru, Johor had tested positive for COVID-19 on 10<sup>th</sup> January 2021. The individual is currently receiving appropriate medical attention. Our thoughts are with the retailer’s employee and the family, and we wish the employee a full and speedy recovery.

Chevron’s utmost priority is the health and safety of our workforce and customers. Upon discovering the employee’s test results, immediate arrangements were made by the retailer to close the station for industrial cleaning and disinfecting as advised by the Ministry of Health (MoH). We anticipate the said Caltex station will re-open soon following the sanitization process. Our other Caltex service stations are not affected by this case and our retailers continue to operate as usual, with strict adherence to the established Standard Operating Procedures (SOPs).

Chevron will continue to work closely with the retailer and MoH on the matter. We remain committed in providing quality service to our valued customers and ensuring minimal disruption in serving the fuel they need during these challenging times.
