Statement from Chevron Malaysia Limited

Chevron Malaysia Limited (“Chevron”), which markets the Caltex retail brand in Malaysia, confirms a suspected COVID-19 case involving a retailer’s employee working at a Caltex station in Taman Sri Mahkota Aman, Jalan Gambang, Kuantan, Pahang on 4 April 2020. This came about after the individual’s father was tested positive for COVID-19 on the same day.

The Ministry of Health (MoH) has tested the individual and has instructed all other employees working at the station to observe self-quarantine while awaiting the individual’s COVID-19 results from MoH. Our thoughts are with the retailer’s employee and family during this difficult time.

Our primary concern is the health and safety of our workforce and customers. The retailer of the station has closed the station so that the staff can self-quarantine at home. Arrangements will be made for industrial cleaning and disinfecting by an environmental and regulated waste management company prior to reopening of the station.

Our other Caltex service stations are not affected by this case and our retailers continue to operate as usual, with appropriate health and safety guidelines in place.

Chevron will carry on seeking advice and guidance from MoH regarding the matter and will continue to monitor the situation very closely for any developments.
